When I asked last semester’s students to give you advice on how to succeed in this course, here is what they said:

Study for the tests there is some serious stuff on them.

*Study a few days in advance so you don't get overwhelmed the day before the test. Sit toward the front so you pay attention.*

Take really good notes, read the majority of articles, and study with friends for a relatively easy A.

*READ!!!!*

Ask questions if you're confused and try to do the readings.

*Take notes on the slides and at least skim all of the readings.*

Always come to classes. They are actually interesting.

*Be sure to make connections between the concepts and the readings.*

Read.

*Definitely try to do the readings and connect them to the concepts we discuss in class.*

Do the readings and show up to class, finish reflections early.

*Form study groups to help study for the tests!*

Make sure you do all the readings and ask questions if you have them. You just want to solidify your understanding of the material.
The class can seem laid back sometimes, but make sure you come to class and do the readings. Trust me, the information is relevant and rewarding.

Know which material specifically applies to each reading (know the titles).

Read and have a full understanding of the concepts and terms from the lectures.

Do the readings and take notes on what the professor says, not just what’s on the powerpoint slides. Know how to apply the concepts.

Do the readings and come to class.

Have fun with the class and do the readings!

Take good notes in lecture – write down the examples. Actually do the readings – they will show up on the test.

Come to class and do the readings.

Come to class! It’s actually enjoyable and helps a ton.

Print out the slides before class and do the readings. They’re usually enjoyable.

Don’t just do the readings, really try to understand how they demonstrate the concepts in class.

Take notes from class and spend time writing your reflections.

Do the readings. Take good notes in class. Don’t procrastinate with the reflections.

Do the readings! Do the readings!

Go to class, do the readings. That simple.

Do the readings and study them, they are important. Beware of the short answers as they can be confusing and TAs can be awful graders. Watch out for tricky multiple-choice.

Attend every class. You never know what day there will be a daily quiz or what day you will see an example that is on the test.

Come to class and take good notes!

Get the reflections done early.

Do all of the readings.

DO THE READINGS and TAKE NOTES.

Do all the readings and print out the PowerPoint slides before class.

Do the readings!

Do all of the assignments and pay attention in class, it is really interesting stuff. Take good notes!

Don’t miss class because the material on tests is pulled directly from lectures. Also, don't save the reflections ‘til the last minute.

Think of how readings and videos apply to concepts.

Sit back and enjoy the ride.

This class is great. The material you learn is so useful in any field you enter. Enjoy the readings and you'll be fine.

Do the readings.
Do the readings! Take notes on the examples in class because they will help when you are studying and trying to learn the concepts.

*Come to class and pay attention. Ask questions.*

Go to class and do the readings.

*Come to class and read. Read.*

Show up to class, they're actually enjoyable most of the time. Also, it'll really help your grade.

*Pay attention to the readings, especially the conclusions.*

It's interesting because it applies to real life.

*Pay attention to the lectures and do the readings.*

Keep up with the readings.

*Come to class, keep up with the readings and get the reflections done early.*

Use real life examples to understand each of the concepts.

*Come to all the classes because they are fun!*

Put in a little effort and you'll gain a lot from this class.

*COME TO CLASS.*

Do most of the readings and go to class, its actually enjoyable!

*Do the readings! And definitely come to class and pay attention!*

Definitely go to the lectures because she gives a lot of helpful examples that aren't in the notes online.

*Do the readings! Be able to provide examples based on the concepts learned in class.*

Go to class and read the readings, at least before the test, and you'll be fine.

*Go to every class and hope for good TAs.*

Do the readings and take notes. Seriously.

*Don't think it's an easy A – you need to pay attention and be disciplined in your work.*

Do the readings, take notes, do reflections early in the year. :)

*You have to come to class...seriously.*

Read and consider the discussion questions at the end of any readings.

*Embrace it. Dive into the material. You’ll find that you already know a lot of it, you just never knew you did.*

Do the readings and go to class.

*If you come to class and pay attention and do the readings you'll do fine.*

Go to class, take notes, do readings.

*Read. Participate. Chill out.*

Come to class and read.

*Stay on top of the reading so you don't fall behind and be able to relate the readings to the concepts.*
Go to class, do the readings, and take good notes.

Go to class.

Come to class, pay attention, take notes and then outside of class try to apply concepts to your everyday life!

Print the power points and take notes on them during class

Come to class, read the assigned readings and look at the PowerPoint to find out the association of the subjects.

Pay attention to lecture and skim the reading.

Read, forreal!!!!!!

Come to class!!! If you miss out it is very hard to make up the information that you miss. Also start the reflections early.

Give Prof. Collett lots of hugs.

Thoughtfully do the readings, trying to understand the concepts presented and connect them with the lectures.

Read for comprehension and make notes in the margins.

Memorize the concepts as you go along and match them to the readings when studying.

Definitely do the readings and come to lecture to listen and take notes.

Read all the readings, do the reflections, do the examples.

The readings are important, but also very interesting. Class is painless, very informative and, dare i say, fun!

Do the readings and always come up with examples that relate to your own life of each concept gone over in class.

Print out PowerPoint slides ahead of time and take extra notes as well

Do the readings. lol ;)

Memorize the slides for the exams. There aren't many but it's worth it. Then connect each reading to a topic.

Do the readings! They help on the tests!

Enjoy this class! If you do the readings you will be fine, but if not remember that college is more about learning than about grades.

Read the readings before each class.

If you want an easy A, do all the readings, go to class, and pay attention.

Take all your notes, do your work, and eat a big hearty breakfast every morning!!!

I'm in love with Prof. Collett. Study for the first test, because I didn't! Then I studied and did well!

It gets easier after the first test.

Don't wait until the last four weeks to do all of the reflections.

Make sure you come to class. The examples from class and the readings are imperative for demonstrating that you understand the concepts on the tests.

Come to class!
